Abstract

"Quarto is a multi-language, next generation version of R Markdown from Posit, with many new features and capabilities. Like R Markdown, Quarto uses knitr to execute R code, and is therefore able to render most existing Rmd files without modification. Extensions are a powerful way to modify and extend the behavior of Quarto." This text was copied verbatim from the Quarto website (quarto.org) to generate text for an abstract within the quarto-kansas extension.

Introduction

TODO Create an example file that demonstrates the formatting and features of your format.

More Information

You can learn more about controlling the appearance of HTML output here: https://quarto.org/docs/output-formats/html-basics.html

Additional Information

This is what a code block looks like:

```
x <- 1
y <- 2

x + y
```

```
[1] 3
```
